Junior IoT Solutions Architect (m/f)

QiBit is the company dedicated exclusively to the field of Information and Communications Technologies (ICT), belonging to Gi Group, one of the world's leading companies providing services for the development of the labour market.

We are searching for a **Junior IoT Solutions Architect (m/f)** to work directly in our Client – a multinational telecommunications company – integrating the Solution Architecture & Technical Assurance team and supporting the high-level design and architecture of non-existing solutions in the company's portfolio.

Main Responsibilities:

- Participate in IoT strategic initiatives, supporting the high-level design of new solutions to the company's IoT portfolio;
- Contribute to complex solution design and develop high-level design documentation;
- Support the impact assessment of requirements that come from Product Management, ensuring that new solutions are aligned with the needs of Product Management Customers and with IoT architecture strategy;
- Support the translation of functional and non-functional requirements into a technical solution design with supporting engineering documentation;
- Perform tasks of impact assessments, requirements' analysis, establishing previews of delivery time and costs.

Main Requirements:

- BSc or MSc level degree in Software Engineering, Computer Science or Telecommunications;
- Previous experience (1-3 years) in developing and/or design roles in software or core network;
- Knowledge of solutions design and architecture practices;
- Interested to work within an international and fast-moving innovative environment;
- Excellent interpersonal, communication and presentation skills;
- Good analytic, critical and strategic thinking;
- Sense of initiative and proactivity.
- Curious and interested in technology innovation;
- Fluency in English (both written and spoken).

If you fulfill the desired requirements, please send your CV to candidaturasLx@qibit.pt with the ref. 15487.
