

Junior IoT Delivery Lead (m/f)

QiBit is the company dedicated exclusively to the field of Information and Communications Technologies (ICT), belonging to Gi Group, one of the world's leading companies providing services for the development of the labour market.

We are searching for a **Junior IoT Delivery Lead (m/f)** to work directly in our Client – a multinational telecommunications company – integrating the Platforms & Enablers Delivery team and supporting the delivery of IoT software as per said requirements, managing software deployment and continuous integration.

Main Responsibilities:

- Support the delivery activities of software modules across complex technology portfolio ensuring the defined requirements, managing all aspects of software deployment and continuous integration;
- Collaborate with IoT business teams planning software releases, enabling a consistent and effective E2E delivery roadmap;
- Work with software developers and designers to generate domain level deployment specifications.

Main Requirements:

- BSc or MSc level degree in Software Engineering, Computer Science or Telecommunications;
- Good academic knowledge of development practices (Java technology is an advantage);
- Motivated to develop professional skills in project and delivery management activities and acquiring a wider perspective of the solutions development lifecycle;
- Interested to work within an international and fast-moving innovative environment;
- Excellent interpersonal, communication and presentation skills;
- Good analytic and strategic thinking;
- Curious and interested in technology innovation;
- Fluency in English (both written and spoken).

If you fulfill the desired requirements, please send your CV to candidaturasLx@qibit.pt with the ref. 15479.
